Tapp DAO Discord Marketplace

Abstract

Tapp DAO introduces a decentralized marketplace within Discord, enabling users to buy, sell, and swap exclusive digital assets using TD Tokens, SOL, and Engage Points. The marketplace facilitates seamless peer-to-peer transactions for NFTs, role retention, and allocations within the Tapp ecosystem.

Introduction

The Tapp DAO Discord Marketplace is designed to provide a seamless trading experience for users within the community. It enables the acquisition, swapping, and retention of exclusive digital assets, leveraging blockchain technology for transparency and security.

Marketplace Offerings

Users can engage in transactions involving:

- **Art Lab NFTs –** Unique digital artworks within the Art Dao ecosystem.
- **Tapp Genesis NFTs –** Mythic, Epic, Rare, and Common NFTs.
- **Tapp OG Retention –** Secure OG roles within the community.
- **Whitelist Allocations –** Access to early-stage projects and token sales.
- **AUM Shares –** Participate in decentralized asset management.
- **Other Digital Assets –** Additional exclusive items from the Tapp ecosystem.

Payment & Transactions

Users can trade assets using:

- **TD Tokens –** The native utility token of Tapp DAO.
- **SOL –** A widely used cryptocurrency in the Solana ecosystem.
- **Engage Points –** Earned through community participation and engagement.
- **NFT Swaps –** Certain assets can be exchanged directly.

Security & Transparency

All transactions occur on a secured marketplace channel, ensuring security and transparency. The marketplace eliminates intermediaries, providing direct and trustless P2P connection with the team.
