Participation Table

Category	Allocation	Link
VIP 1	50 SOL	On Request [Telegram: @DanielSynth]
VIP 2	20 SOL	—
VIP 3	5 SOL	—
Whitelist 1	1.5 SOL	—
Whitelist 2	0.5 SOL	—

Initial Allocation

Proposed. Through governance voting on DAO setup.

Percentage	Destination
30%	$MOTOKO
40%	Daos.Fun Treasury/AUM
30%	wSLN/SOL LP

Investor Return

- A % based on their allocation of daos.fun $TAPP Token (MC/FDV 1B)

- A [% * 0.3] based on their allocation of $MOTOKO Token (MC/FDV 1B)

Governance: Voting

- $TAPP holders will be able to vote on AUM deployment.

- Any $TAPP holder will be able to submit a proposal for review, based on a submission template.

- Voting mechanics to be confirmed at a later date.

- Example proposals: Burn LP, hiring, feature development (SL has the dev team for this if necessary), Agent deployments (on Solana, Base)

Governance: Initial Proposals

On creation of the DAO, 2 proposals will be submitted for voting:

- **Proposal 1: $MOTOKO Participation**
  - Use 30% of treasury to market-buy SLN.
  - These funds will be used to buy $MOTOKO, the first Agent launched on The Major Protocol.

- **Proposal 2: Liquidity Pool Setup**
  - Use 5% of treasury to market-buy SLN, bridge to Solana using Wormhole, and create a LP on Raydium as of wSLN/SOL.
  - Smart Layer will commit remaining 10% of SLN towards LP (50 SOL worth)
  - Trading Fees will accrue to the DAO AUM, to be used as voted by $TAPP holders.
